

Getting started guide

Schedule Facebook Page posts and post to your groups in a fraction of the time

poster.rido.asia

What Rido Poster does

Rido Poster helps you share the same post with your Facebook Pages and groups quickly and safely.

- **Pages:** fully automatic. Write once, pick a time, and Facebook publishes it to your Pages.
- **Groups:** one click each. The Rido Poster browser extension opens each group with your text, photos or video already in the post box. You check it and click **Post**. Then the next group opens.
- **Safe pacing:** up to 20 group posts a day, a pause between groups, one post per group per day, and the same text is never sent to the same group twice in a week. This keeps your Facebook account in good standing.

Do I need a Meta / Facebook developer key? No. You only sign in with your normal Facebook account. Everything else is already set up.

Step 1 - Create your account

- 1 Open **poster.rido.asia** in Chrome, Brave or Firefox on a computer.
- 2 Click **Start your free 1-day trial**, then **Continue with Facebook**.
- 3 Facebook asks which Pages Rido Poster may post to. Tick your Pages and click **Continue**.
- 4 You land on your Dashboard. Your free 1-day trial (Page posting) has started.

Step 2 - Install the browser extension (paid plans)

The extension is what opens your groups and fills in your posts. It comes with every paid plan; the free trial covers Page posting.

- 1 Choose a plan: open **Plans** in the menu and pay with UPI, card or net banking.
- 2 Open **Browser extension** in the menu and click **Download extension (.zip)**. Unzip it.
- 3 In Chrome go to **chrome://extensions** (Brave: **brave://extensions**, Edge: **edge://extensions**), turn on **Developer mode**, click **Load unpacked** and choose the unzipped folder.
- 4 Pin it: click the puzzle icon next to the address bar, then the pin next to Rido Poster.
- 5 On the Browser extension page click **Get extension key** and copy it. Click the Rido Poster icon, open **Settings**, paste the key and click **Save settings**. It now shows **Connected**.

Step 3 - Add your groups

Choose the way that suits you. Groups you add are kept in lists, and you can untick any group before posting.

- **Import all your groups:** stay logged in to Facebook, click the Rido Poster icon and click **Import my groups**. Leave the Facebook tab open until it finishes. Groups appear under the list "From Facebook".
- **One group at a time:** open any group on Facebook, click the Rido Poster icon and click **Save group**.
- **Paste links:** on the Groups page, paste group links (one per line) and click **Add groups**.
- **Find new groups:** type a keyword under **Find groups by keyword**. Facebook's search opens; join the groups you like, then add them.

You can only post in groups you are a member of. If your join request is still pending, Rido Poster skips that group automatically.

Step 4 - Create a post

- 1 Open **Create post**.
- 2 Write your message. Select English words and click **B** for bold or **I** for italic. Use the buttons for bullet lists, dividers, emoji and a call to action (for example "Register here").
- 3 Add hashtags, a link if you have one, and **photos (up to 10) or one video** (up to 200 MB).
- 4 Check the **Preview** and the **Reach checklist** on the right.
- 5 Under **When**, choose **Now** (or a later time). Under **Group posts**, leave **Ready now**.
- 6 Tick your Pages and the groups to post to (each list has a select-all box), then click **Save post**.

Your Pages are posted to straight away, or at the time you chose. Your groups are now ready in the extension.

Step 5 - Post to your groups

- 1 Click the Rido Poster icon. **Ready to post** shows how many groups are waiting.
- 2 Choose **Pause between groups** (2 or 5 minutes is safest).
- 3 Click **Fill next group**. The group opens with your text and photos or video in the post box.
- 4 Check the post and click **Post** on Facebook.
- 5 A yellow banner confirms it and counts down to the next group. When the time is up, the next group opens, already filled in. Click **Post** again.

Handy controls while posting:

- **Open next now** on the yellow banner skips the wait.
- **Close the tab** to skip a group without posting; the next group opens.
- **Skip** or **Mark posted** in the extension list, for any single group.
- If a video is too large to add automatically, the banner shows **Download video**: download it and drag it into the post box.

Stay safe on Facebook

Built-in limits: Rido Poster allows up to **20 group posts a day** per account (it continues the next day from midnight India time). If Facebook shows "We limit how often you can post", Rido Poster **stops and pauses group posting for 24 hours** automatically; the post that didn't go through stays in your list. Page posts aren't limited.

- Post to about **10-20 groups per session**, with a 2-5 minute pause.
- Change a line or two of your text between sessions. Identical text in many groups looks like spam.
- If Facebook shows "We limit how often you can post", **stop for the day**. Don't retry.
- Rido Poster already skips groups you posted to today and never repeats the same text in a group within 7 days.

Plans and payment

Plan	Price	Saved groups
Free trial	Free for 1 day	Pages only
Starter	Rs 49 / month	100
Growth	Rs 99 / month	250
Pro	Rs 199 / month	500

- Open **Plans** in the menu and choose a plan. Pay with UPI, card, net banking or wallet (through Razorpay).
- Each payment gives **30 days**. There is no automatic renewal; pay again to continue. Paying early adds 30 days on top of the time you have left.
- The browser extension for group posting comes with every paid plan, with up to 20 group posts a day. The free trial covers Page posting.
- When the trial or plan ends, your groups and posts are kept. Pay to continue where you left off.

Questions

Does Rido Poster post to groups by itself?

No. Facebook doesn't allow apps to post in groups, so you click Post for each group. Rido Poster does everything else: opening the group, filling in the post, pacing and tracking.

The extension says Offline or shows an error.

Check your internet, then click **Refresh** in the extension. If it mentions your key, copy a new key from the Groups page into the extension's Settings.

The post box didn't fill in.

Use **Copy text** and **Copy photo** in the extension and paste them into Facebook yourself, or close the tab to skip that group.

How do I delete my account?

Open **Plans**, scroll to the bottom and click **Delete my account**. Everything is removed straight away.
